LaunchCode, LC101 Programming Course — 2021
Houston Community College, A.A. Computer Science — 2020
Texas Tech University, Graduate Courses in Electronics and Computer Engineering — 2015
Bogazici University, Turkey, Bachelor of Science — 2013

PROJECT EXPERIENCE

KCBargains — An online platform to share and find local deals utilizing .Net Framework with Google Maps API, Geocoding API, Bootstrap in front end; Entity Framework, Razor view engine and MySQL in the backend.

KCEvents — A bulletin board to register and follow local community events using .Net Framework with CRUD functionality, allows Social Media logins, employs Bootstrap, Maps API, Geolocation API and MySQL.

SpringCommerce — An e-commerce Spring web application built with Spring Boot MVC, Maven, JPA Entity, Hibernate, MySQL, Bootstrap, Vanilla JS, Thymeleaf.

StudentRegistration — A student registration web application allowing CRUD operations based on Spring Boot, Maven, MVC using Hibernate, MySQL, Thymeleaf, H2 database and JPA.

ACHIEVEMENTS

- Pushed a statewide initiative at more than 25 schools to produce thousands of PPE Face Shields to be donated to first responders and healthcare workers in the fight against COVID 19 during Spring of 2020.

- Founded a free-of-charge after school program to teach coding, programming, electronics, 3d modeling and 3d printing to low income minority kids in Southwest Houston.
